

Members of the Source Water Protection Branch inspect a water supply well in Goliad County.

EPA, Region 6 was represented at a Public Meeting in the city of Goliad, following the invitation of the Goliad County Groundwater Conservation District.

County residents are contesting the permit issued by TCEQ to Uranium Energy Corp (UEC) to initiate in-situ solution mining of uranium in ore rich portions of the Evangeline Aquifer.

This Aquifer provides drinking water to a large number of the County residents.

EPA, Region 6 is currently reviewing the request for an Aquifer Exemption submitted by TCEQ on behalf Of UEC.

Members of the Source Water Protection Branch and the Goliad County Groundwater Conservation District visit with members of the Duderstadt family, residents of Goliad County. The Duderstadts own two drinking water supply wells which were adversely affected during the uranium exploratory drilling operations.
